Note: This analysis includes preliminary enrollment data from 50 states and the District of Columbia. "FFCRA" refers to the Families First Coronavirus Response Act. "MOE" refers to the FFCRA's maintenance of effort requirement, which makes available a temporary 6.2 percentage point increase to each state or territory's federal medical assistance percentage (FMAP) during the national public health emergency. As a condition of receiving the FMAP increase, states must meet several requirements pertaining to eligibility and maintenance of enrollment. For additional information on Medicaid and CHIP enrollment prior to the start of the national public health emergency, please see Appendix A.
